The Trilobite® is a state of the art robotic vacuum cleaner designed to make your life easier.

ZA2

PRODUCT BENEFITS

The automatic cleaner that really cleans.
Regular cleaning makes a difference and can dramatically reduce the build up of dust, allergens and other unwanted impurities. This is where the Trilobite® comes in. Fully automatic and slender enough to fit under furniture, this friendly robot takes the back ache out of cleaning. It cleans the floors and minimises dust build up in corners since it enables you to clean far more often.

How it picks up so much dust.
The Trilobite® sends out harmless ultrasound signals to determine the size of the room and then navigates through it. It zig zags back and forth, calculating what's left to clean. Thanks to powerful brushes, it picks up not only dust, crumbs and hair but fine dust particles as well - on everything from low pile carpet to tiles. But it is also sensitive enough to avoid cords and other objects by a few millimetres.

TECHNICAL DATA

Weight (kg):	5
Height:	130
Charging time (Hrs):	2
Cleaning time (mins):	< 60
Diameter (mm):	350
Dustbin capacity:	1.2

Programmable timer lets you decide when to clean.
To return home to a dust free environment, just set the Electrolux Trilobite's® timer to the time and day for cleaning and leave it to do its work. After vacuuming it automatically finds its way back to its docking station to recharge. the only thing left for you to do is charge the filter and empty the dust box - and don't worry, we've made that part really easy!

You decide where it will go and how.
A magnetic safety strip can be placed along certain areas where you don't want the Trilobite® to go. If you have stairs at home, a stair sensor will prevent it from falling down. You can also select the type of programme you want - normal, quick or spot cleaning.

PRODUCT FEATURES

3 cleaning programs
Normal, Quick and Spot cleaning programmes.

Electronic display

Electronic dustbox filter indicator
Electronic dustbox filter indicator tells you when its time to change the filter.

Magnetic strips
Magnetic strips define the working area for the Trilobite and act as a virtual wall. They can be used in doorways, around stairs and partial walls.

Programmable timer
Day/Time programme feature that allows you to select when you want to clean your floors.

Stair sensor
The Trilobite 2.0 is developed to cope with stairs. It will automatically turn back when it comes near the edge of a stair.

180° ultrasound
Navigates the room by using 180° ultrasound.
